Our consistent internal message is that every client is important to us and we shall endeavor to meet each of their needs without compromising our professional reputation which includes both the firm's reputation and the reputation of each of our professionals.

We have a special eye to transform your brief from idea to artistic impression and finally to the property of your dreams that conform to the new generation of 21st century aesthetics and design.

About KECCO

Kingston Engineering and Construction Consultants is a leader in the industry with all the relevant certifications and memberships.

Founded in 2005, Kingston Engineering and Construction Consultants is a multidisciplinary engineering firm employing a staff of professionals comprised of civil, structural and environmental engineers, surveyors, planners and construction inspectors. The substantial experience of our staff presents a company that is highly qualified to accomplish projects varying in size, scope or complexity. Our model is direct delivery of civil engineering and groundwork elements across our main areas of focus, combined with effective procurement and management of specialists to provide a turnkey service to complex and demanding main contracts.

Our Values

MISSION

To be a multi-industry provider with an outstanding reputation for service designed to meet and exceed our client expectations.

VISION

Our vision is to be the most valued service partner in the eyes of our clients, by providing solutions that matter.

OUR COMPANY VALUES

INTEGRITY. From senior management to the field level, all activities will be carried out with a total commitment to integrity.

QUALITY. All of our work will be executed with strict adherence to all OSHA, EPA, federal, state and local regulations and in full compliance with our corporate safety program.

PERFORMANCE. All projects will be performed on time, on budget and in total accordance with project specifications.

CUSTOMER SATISFACTION.

No project is closed until the customer is satisfied with all aspects of the project. We have built a tremendous base that ensures customer satisfaction.

AFFORDABLE PRODUCTION.

We combine vast project experience with leading edge technology to achieve higher levels of productivity, ultimately lowering project cost. We constantly strive to provide our clients with the best performance at an affordable cost.

Customers Growth Up To

80 Clients

KECCO is your complete solution.

We are a privately owned company whose senior management team has provided creative business intelligence and managed services to a wide range of clients for over fifteen years. We specialize in providing services with a track record of delivered success on some of the most demanding projects. This expertise provides both creative construction methodology and detailed logistics planning. Our team is led by nationally recognized hands-on executives with strong operational and financial backgrounds, creative strategists and pragmatic implementers. KECCO limited is dedicated to building the necessary foundation for sustainable future developments.

Our Key Services

KECCO offers superior efficient and integrated focused logistic service solutions based on Integrity, Transparency, Client commitment, Fulfilment of our people and output of the highest standard. We derive our capabilities from multi disciplinary professionals and strategic partnerships with industry leaders across the globe in similar business in attaining our goals. Such platforms allow us to offer oilfield related services such as seismic, drilling logistics and other supported services.

Maintaining International Health, Safety and Environmental standards is always kept pivotal while carrying our specific work scopes for our clients. All National and Industry regulations are fully abided by and entirely complied with.

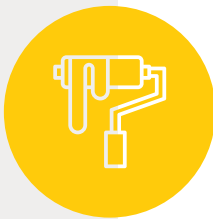

Drilling waste management (DWM)

Fundamental to our drilling waste management strategy is not only minimizing waste, but also transforming it into a beneficial resource. To ensure that these steps are well implemented, precise planning for both environmental protection as well as cost-effectiveness is pivotal. This involves studies to review both the project and the disposal criteria which need to be customised for specific requirements..

Camp building and management

We offer companies with remote locations a home away from home environment. As manufacturers of man camps and major projects,

Uganda Revenue Authority
DEVELOPING UGANDA TOGETHER

KECCO Team

We recognize that our primary asset is people.

To be successful, our company must be a rewarding place to work. We provide opportunity and encouragement to our staff and work as a team with our clients. We will at all times hire the best personnel to effectively deliver superior services. Focus is made to not only their professional qualifications but their work ethics and the ability to fit within the desired organization's culture to reflect the appropriate image. Each member works tirelessly to serve our common purpose: to provide an exceptional and professional experience with honesty, integrity, quality, and open communication. Our technical team is well cultured, and consists of highly skilled personnel, and innovative consultants trained to match the current industry trends, lifestyle and experience.

Michael Muhumuza

Managing Director

Michael's 20 years of engineering & construction and management experience can be manifested in the numerous high-end civil, construction, electrical and power projects successfully accomplished under his stewardship. Michael is also Member of Uganda National Association of Building & Civil Engineering Contractors (UNABCEC), a member based association accredited to represent interests of building and civil engineering contractors and a point of reference for the development of the construction industry in Uganda. He has worked with the government of Uganda, is a board member of the Non Governmental Organisation PMCO and also holds many leadership positions in the community.

Stephen Magera

Director Finance and Accounting

Stephen has over 15 years of real estate financing and development. He holds a Masters of Science in Project Management from the University of Salford -UK. He has led various teams in managing multi-dimensional projects where his excellent project management skills have enabled smooth and excellent project execution. He has worked as a senior leader in government institutions where he has developed strong networks in the construction sector that have been key in developing strong partnerships for KECCO and enabled the company to successfully execute projects of any magnitude.

With more than 6 years' experience in project management, communication and human resource, Faith's vast knowledge in financial management and taxation delivers the much needed value for money required for all KECCO projects.

Organisation and Management

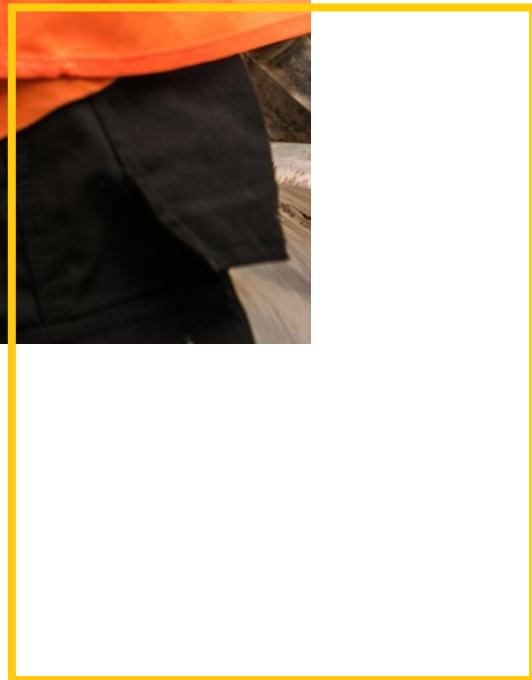

We have in place a quality management system (QMS) manual, which uses ISO 9001:2015 as a framework that allows our organisation to document and improve our practices in order to continuously better satisfy the needs and expectations of our customers, stakeholders and interested parties

The current main characteristics of our governance model is as follows:

- A Board of Directors that defines general policy, strategy and monitors the company's operational management;
- A Managing Director who takes the primary responsibility for operational management, including, but not limited to, day-to-day management.
- Departmental managers who oversee supervision of different assignments in their respective business operations while forming a management committee.

Health & Safety Policy

It is the policy of our company to provide employees with a safe and healthful working environment and with occupational health services as defined in the statutory policy guidelines for personnel at the work place.

We ensure that all our personnel are trained and certified by relevant bodies especially those in the engineering and technical services department.

We view safety as our highest core value, and believe that all incidents are preventable, and that effective health and safety management delivers increased value to our shareholders, customers, employees and contractors.

The Markets We Serve

Sector

What Sets Us Apart

One size doesnt fit all

Each project is unique. At KECCO we spend time to really understand the requirements to ensure each client receives a bespoke service, tailored to their needs.

Deep Experience

Years experience of engineering services to several happy clients. Broad Capabilities KECCO is structured into a number of specialist divisions each focused upon a particular engineering discipline. Unified by strategic principles, these divisions together provide a broad range of core capabilities.

Long Term Business Relationships

We believe that business should be conducted fairly and openly: testimony to which is the long term business relationships we have with our clients.

Health, Safety & Environment

Respect for the environment and protecting the health and wellbeing of our staff and those with whom we work is at the centre of all we do.

Value

Every client has different priorities and each project specific value drivers. We work collaboratively with clients to optimise value from project budgets by considering a range of engineering options including intergration of new technology into existing infrastructure and energy efficient solutions.

On Time

We understand that delivering a project late can have serious implications for our client. KECCO has established a reputation for delivering challenging, complex projects on time.

Whether your requirements are for office, residential, retail or other commercial business units, extension or complete new build, KECCO will bring experience, commitment and vision to your project.

LANDSCAPING
We design and beautify gardens, walkways, parks, homeyards and other outdoor spaces with interest in the usability and class. Others include paving, swimming pools. We are keen on the environmental impacts of our projects.

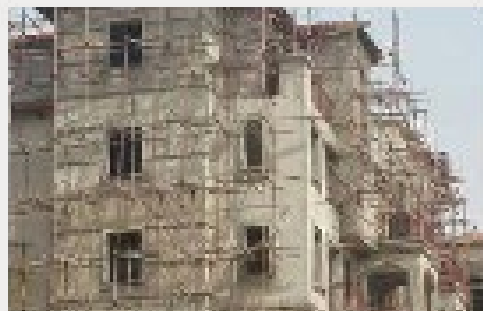

CIVIL WORKS

From bridges, roads to tunnels and treatment plants, we carry out all forms of civil work, above or below ground. Public roads, private roads, roundabouts and bridges. We have experience in all types of road construction.

Industrial & Warehousing

We purpose to provide excellent civil engineering services tailored to suit our clients' needs; be it new build warehouse, repair or design with the highest code of operational professionalism.

MACHINERY
 KECCO uses both large and small equipment in surveying, excavation, building, construction, grading, hauling etc.

CONSULTANCY
 Plans and artistic impressions. We derive our motivation from customer satisfaction which is insured by our team of professionals who are flexible to the client needs.
